Participants of the Meeting
XIV

In Memoriam Dr. Mildred Scheel
XXI

F. A. Anders
The Mildred Scheel 1988 Memorial Lecture. A Biologist's View of Human Cancer
XXIII

Wilsede Scholarship Holders
XLVI

Preface
XLVIII

Acknowledgements
LIV

eN. A. Mitchison
Introduction: Differentiation-Oncogenes
LV

Frederick Stohlmann Jr. Memorial Lecture

J. D. Rowley
Molecular Analysis of Rearrangements in Philadelphia (Ph1) Chromosome-Positive Leukemia

M. A. S. Moore Interactions Between Hematopoietic Growth Factors: The Clinical Role of Combination Biotherapy	11
 Clinical Aspects	
F. Lampert Introduction of Donald Pinkel	25
 D. Pinkel Species-Specific Therapy of Acute Lymphoid Leukemia	 27
 R. Storb Current Issues and Future Directions in Marrow Transplantation	 37
 E. Schulze, W. Helbig, and U. Hofmann The Use of Long-term Bone Marrow Cultures (LTBMC) to Detect Hematotoxic Side Effects of Pur	 46
 W.-D. Ludwig, H. Seibt-Jung, J. V. Teichmann, B. Komischke, A. Gatzke, G. Gassner, E. Odenwald, J. Hofmann, and H. Riehm Clinicopathological Features and Prognostic Implications of Immunophenotypic Subgroups in Child	 51
 G. K. Rivera, D. K. Kalwinsky, J. Rodman, L. Kun, J. Mirro, Ching-Hon Pul, M. Abromowitch, J. Ochs, W. Furman, V. M. Santana, O. H. Hustu, J. Sand-lund, and W. M. Crist Current Approaches to Therapy for Childhood Lymphoblastic Leukemia: St. Jude Studies XI (1984-	 58

L. Konopka, S. Pawelski Results of Three Polychemotherapy Programs in Non-Hodgkin's Lymphomas	65
J. Boguslawska-Jaworska, B. Kazanowska, B. Rodziewicz-Magott, W. Pietras, J. Armata, P. Daszkiewicz, A. Dluzniewska, M. Koehler, M. Matysiak, M. Ochocka, U. Radwaiska, R. Rokicka-Milewska, D. Sorita-Jakimczyk, and I. Zmudzka Results of Treatment in Children with B-Cell Lymphoma: Report on the Polish Leukemia/Lymphoma Study Group	71
A. Petrakova, J. Stary, O. Hrodek, P. Goetz, K. Venclikova, J. Srajer Correlations of Clinical and Laboratory Data for Prognosis in Childhood Acute Lymphoblastic Leukemia	75
K. Swencz-Szczepanik, M. Krämer, L. Konopka, M. Brodzki, S. Pawelski, and A. Deptala Central Nervous System Involvement in Non-Hodgkin's Lymphomas	78
J. Mirro Jr., W. R. Crom, D. K. Kalwinsky, V. M. Santana, D. K. Baker, and J. Belt Targeted Plasma Drug Concentration: A New Therapeutic Approach to Relapsed Nonlymphoblastic Leukemia	82
Huang Meng-er, Ye Yu-chen, Chen Shu-rong, Chai Jin-ren, Lu Jia-xiang, Zhao Lin, Gu Long-jun, and Wan Use of All-trans Retinoic Acid in the Treatment of Acute Promyelocytic Leukemia	88
F. E. Cotter, P. A. Hall, B. D. Young, and T. A. Lister Simultaneous Presentation of B- and T-Cell Malignant Lymphoma	97
R. Ihle, H. Matthes, and H. Ihle Phenotype Switch in Acute Leukemia Patients After Intensive Chemotherapy	101

J. Holowiecki, D. Lutz, V. Callea, M. Brugiattelli, S. Krzemien, B. Stella-Holowiecka, A. Neri, R. Ihle, V. S.	Expression of Cell Differentiation Antigens as a Prognostic Factor in Acute Leukemia	104
F. Zintl and R. Häfer	Immunologic Subclassification of Acute Lymphoblastic Leukemia in Childhood and Prognosis (Modified B	109
A. T. Look	Constellations of Genetic Abnormalities Predict Clinical Outcome in Childhood Malignancies	113
J. Harbott, J. Ritterbach, and F. Lampert	Leukemia Cytogenetics in Children: Results of the German Therapy Studies	121
T. Rozmyslowicz	Cytostatic Influence of Thioprolin on Peripheral Lymphocytes of Healthy Persons and Non-Hodgkin's Lymphoma Patients	127
S. Mizutani, K. Nakamura, M. Ozaki, C. Iannura, M. Sasaki, Y. Tsunetsugu, J. Fujimoto, T. Hata, and N. Kobayashi	Diversity of Molecular Phenotypes in Acute Leukemias	131
B. Opalka, O. Kloke, U. Wandl, R. Becher, and N. Niederle		134
D. W. Galvani	Interferon in Myelodysplasia	139

W. H. Meyer, P. J. Houghton, M. E. Horowitz, E. Etcubanas, C. B. Pratt, F. A. Hayes, E. L. Thompson, A. A
Use of Investigational Drugs as Initial Therapy for Childhood Solid Tumors

141

P. J. Houghton and J. A. Houghton
Xenografts of Pediatric Solid Tumors: Predictive Intermediate Models?

149

Cell Biology

A. Friedenstein

Stromal-Hematopoietic Interrelationships: Maximow's Ideas and Modern Models

159

E. Elstner, M. Wächter, and R. Ihle

Bone Marrow Stromal Cells in Myelodys-plastic Syndromes and Acute Nonlymphocytic Leukemia

168

C. P. Daniel, I. L. O. Ponting, and T. M. Dexter

Growth and Development of Haemopoietic Cells: A Deterministic Process?

172

J.L. Chertkov, E. I. Deryugina, N. J. Drize, and E. Y. Sadovnikova

Limited Proliferative Potential of Primitive Hematopoietic Stem Cells: Hematopoiesis by Clonal Succession

178

B. V. Afanasyev, V. A. Shatrov, and L. N. Balayan

The Effect of Human and Rat Fetal Bone Hematopoiesis In Vitro and In Vivo

183

C. Laker, C. Stocking, N. Kluge, M. J. Franz, G. Beck-Engeser, E. Spooncer, M. Dexter, and W. Ostertag
Aberrant Expression of the Multi-CSF Gene in Hematopoietic Precursor and Stem Cell Lines Initiates Leukemia

- U. Just, E. Spooncer, M. Katsuno, I. Hampson, M. Dexter, J. F. DeLamarter, C. Stocking, N. Kluge, W. Ostertag
Infection of Multipotent IL-3-dependent Stem Cells With a Retroviral Vector Containing the IL-3 Gene Cor
197
- M. Kawai, T. Mori, C. Stocking, and K. Notake
Isolation of Revertants from a Factor-Independent Myeloid Cell Line
206
- D. P. Gearing
Comparison of Factors which Induce Differentiation of the Murine Myeloid Leukaemic Cell Line M1
208
-  214
220
- B. Kazanowska, J. Boguslawska-Jaworska, and D. Konopinska
Effect of Natural and Synthetic Peptides on the Biological Function of Leukemic Cells
223
- K. Wielckens, S. Bittner, and T. Delfs
Mechanisms of Glucocorticoid-Induced Growth Inhibition and Cell Lysis in Mouse Lymphoma Cells
226
- J. Minowada, K. Kohno, Y. Matsuo, H. G. Drexler, T. Ohnuma, W. J. M. Tax, and M. B. Brenner
Characteristics of 27 Human T-Cell Leukemia Cell Lines With/Without T-Cell Receptors of *T3-Tia β* or T3-T
233

A. Peled and N. Haran-Ghera Intervention in Potential Leukemic Cell Migration Pathway Affects Leukemogenesis	237
N. Haran-Ghera, L. Trakhtenbrot, P. Resnitzky, and A. Peled Preleukemia in Experimental Leukemogenesis	243
R. A. Padua, G. Carter, D. Hughes, J. Gow, C. Farr, D. Oscier, F. McCormick, and A. Jacobs RAS Mutations in Preleukaemias	250
 Immunology	
N. A. Mitchison Logical Structure of the Immunoregulatory Compartment	257
H.-D. Haubeck, I. Minkenber, and E. Kölsch Analysis of T Suppressor Cell-Mediated Tumor Escape Mechanisms Is Facilitated by the Selective In Vitro Activation of Tumor-specific Ts Cells	260
C. W. Rettenmier Role of the Colony-Stimulating Factor-1 Receptor (<i>c-fms</i>) and Its Ligand in Oncogenesis	263
S. H. Gohla, H.-D. Haubeck, S. Schrum, H. Soltau, and R. D. Neth Activation of CD4-Positive T Cells by Polysaccharide Fractions Isolated from the Cupressaceae <i>Thuja occid</i>	268
J. Atzpodien, C. Bühner, S. C. Gulati, D. Wisniewski, S. Öz, H. Kirchner, T. Benter, H. Poliwoda, K. Welte, Induction of Nonspecific Cell-Mediated Cytotoxicity: A Multisignal Event and its Cellular Regulation	

P. J. Leibson, K. P. Windebank; T. J. Barna, and R. T. Abraham
Signal Trans-duction Mechanisms in Human Natural Killer Cells Mediating Antitumor Immunity

281

H. Schreiber, H. Koeppen, and P. L. Ward
Tumor-Specific Antigens and Tumor-Specific Mutant Proteins in Mouse and Man

284

289

293

F. Herrmann, A. Lindelnann, S. A. Cannistra, M. Brach, W. Oster, J. D. Griffin, and R. Mertelsmann
Monocyte Interleukin-1 Secretion Is Regulated by the Sequential Action of γ -Interferon and Interleukin-2 In

299

D. Campana, E. Coustan-Smith, L. Wong, and G. Janossy
The Expression of T-Cell Receptor-Associated Proteins in Normal and Leukemic Immature T-Cells

316

Molecular Genetics

M. J. M. van der Feltz, M. K. K. Shivji, G. Grosveld, and **L. M.** Wiedemann
Molecular Analysis of the Translocation Breakpoint in a Philadelphia-positive, bcr-negative ALL Patient

331

T. McKeithan, H. Ohno, J. Rowley, and M. Diaz
Cloning of the Breakpoint Junction of the Translocation 14; 19 in Chronic Lymphocytic Leukemia

	335
A. Guerrasio, C. Rosso, A. Tassinari, A. Zaccaria, and G. Saglio Variant Breakpoint Positions on Chromosome 22 in Ph ⁺ -Positive Chronic Myelogenous Leukemias	337
Guo-wei Rong and Shi-shu Chen Expression of Cellular Oncogenes in Primary Cells from Human Leukemias	339
M. A. Bains, P. Pedrazzoli, T. G. Hoy, and A. Jacobs <i>c-myc</i> and <i>c-myb</i> Oncoproteins During Induced Maturation of Human Myeloid and Erythroid Leukaemic Lines	343
T. Tzavaras, N. Testa, J. Neil, and D. Onions Isolation and Characterisation of a Myeloid Leukaemia Inducing Strain of Feline Leukaemia Virus	347
A. M. Ford, L. E. Healy, S. M. Watt, E. Spooner, T. M. Dexter, H. V. Molgaard, and M. F. Greaves Cell Lineage Specificity of Chromatin Configuration and Gene Expression in Haemopoietic Progenitor Cells	352
T. Boehm, R. Baer, L. Buluwela, A. Forster, I. Lavenir, E. Nacheva, J. Waters, L. White, D. Williams, and T. H. Rabbitts Chromosomal Translocations Involving the T-Cell Receptor d-Chain Locus and Two Loci on the Short Arm	357
M. Dean, C. Stewart, A. Perry, B. Gerrard, T. Beck, U. Rapp, M. Drumm, M. Iannuzzi, F. Collins, and S. O' Genetic Markers for Oncogenes, Growth Factors, and Cystic Fibrosis	360

- E. I. Frolova, G. M. Dolganov, M. L. Markelov, and B. Zhumbaeva
Close Localization of the Genes for GM-CSF and IL3 in Human Genome 390
- E. Böhnlein, J. W. Lowenthal, Y. Wano, B. R. Franza, D. W. Ballard, and W. C. Greene
HIV-1, HTLV-I and the Interleukin-2 Receptor: Insights into Transcriptional Control 393
- H. D. Buchow, E. Tschachler, R. C. Gallo, and M. Reitz Jr.
HIV-1 Replication Requires an Intact Integrase Reading Frame 402
- V. Heisig, G. Jahn, M. Ebeling, and R. Laufs
Use of a HIV-1 Retroviral Vector System for Gene Transfer into Human Cells 406
- C. Moroni, I. D. Diamantis, A. Wodnar-Filipowicz, and A. P. K. Nair
Multistage Mastocytoma Model Characterized by Autocrine IL-3 Production 407
- M. J. Lenardo, A. Kuang, A. Gifford, and D. Baltimore
Purified Bovine NF- κ B Recognizes Regulatory Sequences in Multiple Genes Expressed During Activation of T Cells 411
- S. Burdach, N. Zessack, and L. Levitt
Hematopoietic Growth Control by the T-Cell CD2 Determinant is Exerted at a Pretranslational Level 416

- W. S. Alexander, O. Bernard, W. Y. Langdon, A. W. Harris, J. M. Adams, and S. Cory
Oncogene Cooperation and B-Lymphoid Tumorigenesis in *Er-myc* Transgenic Mice 423
- A. van den Broeke, Y. Cleuter, G. Chen, D. Portetelle, M. Mammerickx, D. Zagury, M. Fouchard, L. Coulo
Even Transcriptionally Competent Proviruses Are Silent in Bovine Leukemia Virus Induced Tumor Cells 428
- P. G. Knyazev, I. F. Nikiforova, O. M. Serova, L. B. Novikov, G. F. Pluzhnikova, A. M. Abramov, and J. F.
Restriction Fragment Length Polymorphism of the c-Ha-ras-1 Proto-Oncogene as a Marker of Genome Alte
433
- H. Kalthoff, C. Röder, K. Schewe, W. Schmiegel, H.-G. Thiele, B. Heimann, H. Bading, K. Schramm, and
K. Moelling
Analysis of *c-raf* Oncogene Expression in Gastrointestinal Tumor Cells 436
- R. J. Fisher, S. Fujiwara, N. K. Bhat, C. W. Schweinfest, and T. S. Papas
c-ets-2 and the Mitogenic Signal Pathway 441
- J. V. Teichmann, W.-D. Ludwig, H. Seibt-Jung, G. Sieber, und E. Thiel
Induction of Lymphokine-Activated Killer (LAK) Cells Against Human Leukemia Cells
449
- 453
- C. Leib-Mösch, D. E. Barton, R. Brack-Werner, B. Foellmer, T. Werner, D. Rohrmeier, U. Francke,
Genetic Characterization of a Human Endogenous Retroviral Element Located on Chromosome 18c
461
- R. Brack-Werner, C. Leib-Mösch, T. Werner, V. Erfle, and R. Hehlmann

Human Endogenous Retrovirus-like Sequences	464
Early Life and Evolution	
D. C. Gajdusek Fantasy of a "Virus" from the Inorganic World: Pathogenesis of Cerebral Amyloidoses by Polymer Nucleating Agents and/or "Viruses"	481
E. T. Degens Clay Minerals - Blueprints of Early Life	500
S. Ohno Modern Coding Sequences Are in the Periodic-to-Chaotic Transition	512
D. Busby Translation to Human Temperaments of the Tyrosin-Kinase Active Site of the Human Insulin Receptor β -Chain	520
Subject Index	527
